A lead hazard risk assessment must be completed of all child use areas, including any outdoor play areas, for a child care center built prior to 1978. For each room/area/wing inspected, indicate whether any lead hazards were found by indicating "yes" or "no." If lead hazards were found, the hazard must be addressed. Indicate "addressed" once a lead hazard has been satisfactorily addressed. If a lead hazard was found, list the hazards and how they were addressed.

Note: A lead hazard risk assessment determines the existence of current lead-based paint hazards and identifies options for reducing those hazards. For more information, go to http://michigan.gov/dhs/0,4562,7-124-5529_49572_53751-336885--,00.html.
