INDEPENDENT AUDITOR'S REPORT

Honorable Mayor and Members of the City Commission City of Boyne City, Michigan

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Boyne City, Michigan (the "City") as of and for the year ended April 30, 2014, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Boyne City, Michigan, as of April 30, 2014, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, the schedules of funding progress and employer contributions for the pension and other postemployment benefits plans, and budgetary comparison information as listed in the table of contents be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City's basic financial statements. The combining and individual fund financial statements as listed in the table of contents are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining and individual fund financial statements are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing

standards generally accepted in the United States of America. In our opinion, the combining and individual fund financial statements are fairly stated in all material respects in relation to the basic financial statements as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated October 8, 2014, on our consideration of the City of Boyne City, Michigan's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the City's internal control over financial reporting and compliance.

Management's Discussion and Analysis

As management of the City of Boyne City, Michigan (The "City" or "government") we offer readers of the City's financial statements this narrative overview and analysis of the financial activities of the City for the fiscal year ended April 30, 2014. We encourage readers to consider the information presented here in conjunction with the financial statements.

Financial Highlights

- The assets of the City exceeded its liabilities at the close of the most recent fiscal year by \$21,985,442 (net position). Of this amount, \$6,544,086 represents unrestricted net position, which may be used to meet the government's ongoing obligations to citizens and creditors.
- At the close of the current fiscal year, the City's governmental funds reported combined fund balances of \$3,873,444, an increase of \$271,321 in comparison with the prior year. Approximately 64% of this amount (\$2,485,027) is available for spending at the government's discretion (unassigned fund balance).
- At the end of the current fiscal year, unassigned fund balance for the general fund was \$2,485,027, or approximately 80% of total general fund expenditures and transfers out.

Overview of the Financial Statements

The discussion and analysis provided here is intended to serve as an introduction to the City's basic financial statements. The City's basic financial statements consist of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also includes supplementary information intended to furnish additional detail to support the basic financial statements themselves.

Government-wide Financial Statements. The government-wide financial statements are designed to provide readers with a broad overview of the City's finances, in a manner similar to a private-sector business.

The *statement of net position* presents financial information on all of the City's assets and liabilities, with the difference reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the City is improving or deteriorating.

The *statement of activities* presents information showing how the City's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported for some items that will only result in cash flows in future fiscal periods (e.g., accrued but unpaid other postemployment benefits and earned but unused vacation leave).

Both of the government-wide financial statements distinguish functions of the City that are principally supported by taxes and intergovernmental revenues (governmental activities) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (business-type activities). The governmental activities of the City include general government, police and fire protection, streets, rubbish collection, health and welfare, community and economic development, and recreation and culture. The business-type activities of the City include water and sewer services.

The government-wide financial statements can be found on pages 16 - 17 of this report.

The government-wide financial statements include not only the City of Boyne City itself (known as the primary government), but also a legally separate Downtown Development Authority, Local Development Finance Authority, and the Boyne City Housing Commission for which the City is financially accountable. Financial information for these component units is reported separately from the financial information presented for the primary government itself.

The combining component unit financial statements can be found on pages 27 - 28 of this report.

Fund Financial Statements. A *fund* is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The City, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the City can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

Governmental Funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in assessing a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for *governmental funds* with similar information presented for *governmental* activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between *governmental funds* and *governmental activities*.

The City maintains eight individual governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the general, major streets, local streets, and ambulance funds, which are considered to be major funds. Data from the fire, Boyne Thunder, marina, and airport funds is presented as a separate column as they are considered nonmajor funds.

The City adopts an annual appropriated budget for the general fund and each special revenue fund. A budgetary comparison schedule for the general fund and each major special revenue fund has been provided to demonstrate compliance with these budgets.

The basic governmental fund financial statements can be found on pages 18 - 21 of this report.

Proprietary Funds. The City maintains two types of proprietary funds. *Enterprise funds* are used to report the same functions presented as *business-type activities* in the government-wide financial statements. The City uses enterprises funds to account for its water and sewer operations. *Internal service funds* are an accounting device used to accumulate and allocate costs internally among the City's various functions.

The City uses an internal service fund to account for motor vehicle costs by allocating the cost to the funds that are using the resources. Because these services predominantly benefit governmental rather then business-type functions, they have been included within the governmental activities in the government-wide financial statements.

Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. The proprietary fund financial statements provide separate information for the water and sewer operations, both of which are considered to be major funds of the City. The internal service fund data is presented in the proprietary fund financial statements.

The basic proprietary fund financial statements can be found on pages 22 - 25 of this report.

Fiduciary Funds. Fiduciary funds are used to account for resources held for the benefit of parties outside of the government. Fiduciary funds are not reported in the government-wide financial statements because the resources of those funds are not available to support the City's own programs. The accounting used for fiduciary funds is much like that used for proprietary funds. The City reports one type of fiduciary fund, an agency fund.

The *agency fund* reports resources held by the City in a custodial capacity for individuals, private organizations, and other governments.

The fiduciary fund financial statement can be found on page 26 of this report.

Notes to the Financial Statements. The notes provide additional information that is necessary to acquire a full understanding of the data provided in the government-wide and fund financial statements.

The notes to the financial statements can be found on pages 29 - 47 of this report.

Other Information. In addition to the basic financial statements and accompanying notes, this report also presents *required supplementary information* concerning the City's budgetary comparison schedules and the City's schedules of funding progress and employer contributions for the pension and other postemployment benefits plans.

Required supplementary information can be found on pages 49 - 54 of this report.

This report also presents other supplementary information which includes the nonmajor fund combining and individual statements. The combining statements are presented immediately following the required supplementary information on pensions.

Combining and individual fund statements and schedules can be found on pages 56 - 64 of this report.

Government-wide Overall Financial Analysis

As noted earlier, net position over time may serve as a useful indicator of a government's financial position. In the case of the City, assets exceeded liabilities by \$21,985,442, at the close of the most recent fiscal year.

Total Net Position	\$ 12,738,133	\$ 12,110,117	\$ 9,247,309	\$ 8,925,603	\$ 21,985,442	\$ 21,035,720		

By far, the largest portion of the City's net position (\$14,753,059, or 67%) reflects its investment in capital assets (e.g., land, buildings, machinery, equipment, vehicles, and infrastructure), less any related outstanding debt that was used to acquire those assets. The City uses these capital assets to provide a variety of services to its citizens. Accordingly, these assets are not available for future spending. Although the City's investment in capital assets is reported net of related debt, it should be noted that the resources used to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of the City's net position (\$688,297, or 3%) represents resources that are subject to external restrictions on how they may be used. The remaining balance of \$6,544,086 is unrestricted and may be used to meet the government's ongoing obligations to its citizens and creditors.

At the end of the current fiscal year, the City is able to report positive balances in all reported categories of net position, both for the government as a whole, as well as for its separate governmental and business-type activities. The same situation held true for the prior fiscal year.

Cash and cash equivalents increased significantly during the year, from \$5,028,687 as of April 30, 2013 to \$5,932,115 as of April 30, 2014. This is a direct result of the City actively monitoring the expenditure side of its ledger to keep costs down during the year, which yielded an overall increase in net position for the year of \$949,722.

Also, accounts payable changed significantly during the year, from \$58,054 as of April 30, 2013 to \$132,649 as of April 30, 2014. This is primarily a result of the City taking possession of multiple, and larger, capital asset purchases near April 30. This, accordingly, resulted in a temporary increase in accounts payable as the capital assets were not paid until the following fiscal year.

The City's overall net position increased \$949,722 from the prior fiscal year. The reasons for this overall increase are discussed in the following sections for governmental activities and business-type activities.

Governmental Activities. Governmental activities increased the City's net position by \$628,016. The total increase was the result of total revenues of \$5,937,784 less total expenses of \$5,309,768.

Property taxes continued to decline for the City due to a diminished tax base. Property tax revenues in the governmental activities were \$2,803,775 for the year ending April 30, 2013 and decreased to \$2,779,574 for the year ending April 30, 2014. The City is hopeful that the statewide trend of stabilizing tax bases will be reflected in the City's tax base in the upcoming years.

Business-type Activities. Business-type activities increased the City's net position by \$321,706. The total increase was the result of close monitoring of expenses during the year and an overall increase in charges for services of \$158,821 compared to the prior year.

City of Boyne City Change in Net Position for Fiscal Years Ended April 30, 2014 and April 30, 2013

Financial Analysis of Governmental Funds

As noted earlier, the City uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental Funds. The focus of the City's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the City's financing requirements. In particular, unassigned fund balance may serve as a useful measure of a government's net resources available for discretionary use as they represent the portion of fund balance which has not yet been limited to use for a particular purpose by either an external party, the City itself, or a group or individual that has been delegated authority to assign resources for use for particular purposes by the City's Commission.

At April 30, 2014, the City's governmental funds reported combined fund balances of \$3,873,444, an increase of \$271,321 in comparison with the prior year. Approximately 64% of this amount (\$2,485,027) constitutes *unassigned fund balance*, which is available for spending at the government's discretion. The remainder of the fund balance is either *nonspendable*, *assigned*, *or restricted* to indicate that it is 1) not in spendable form (\$43,110 for inventories and prepaid items), or 2) restricted for particular purposes (\$28,081 for major and local streets), or 3)

committed (\$142,241 for compensated absences), or 4) assigned (\$276,189 for various purposes).

The general fund is the chief operating fund of the City. At the end of the current fiscal year, unassigned fund balance of the general fund was \$2,485,027, while total fund balance increased to \$2,934,609. As a measure of the general fund's liquidity, it may be useful to compare both unassigned fund balance and total fund balance to total general fund expenditures. Unassigned fund balance represents approximately 80 percent of total general fund expenditures and transfers out, while total fund balance represents approximately 95 percent of that same amount.

The fund balance of the City's general fund increased by \$501,438 during the current fiscal year. The City Commission monitors the expenditures of the general fund closely to ensure that spending does not exceed the City's available resources.

The major streets fund, a major fund, had a \$51,366 decrease in fund balance during the current fiscal year which put the overall fund balance at \$15,946. This decrease in fund balance is due to the increased costs associated with winter maintenance with the near record winter snowfall during the year.

The local streets fund, a major fund, had a \$2,026 increase in fund balance during the current fiscal year which put the overall fund balance at \$12,915. This increase in fund balance is due to a large transfer from the general fund to cover a significant portion of current year expenditures.

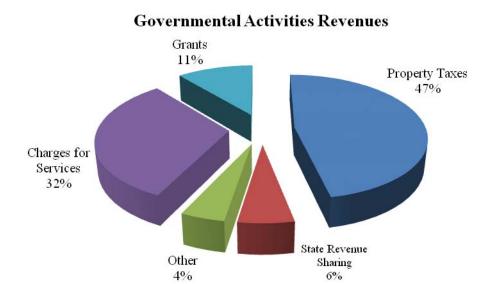

The ambulance fund, a major fund, had a \$29,056 decrease in fund balance during the current fiscal year which put the overall fund balance at \$112,923.

Proprietary Funds. The City's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail.

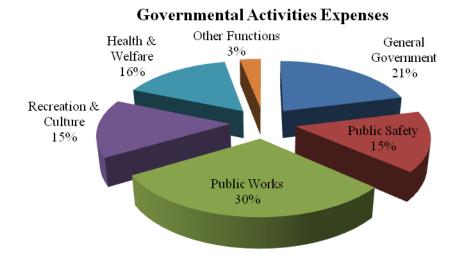

Unrestricted net position at the end of the year was \$370,697 for the water fund and \$1,628,116 for the sewer fund. The decrease in net position was \$360 for the water fund and an increase of \$322,066 for the sewer fund. Charges for service in the water and sewer funds compared to the prior year increased \$52,325 and \$106,496, respectively.

Governmental Activities

The following chart summarizes the revenue sources for the governmental activities of the City for the most recent fiscal year end.

The following chart summarizes the expenses for the governmental activities of the City for the most recent fiscal year end.

General Fund Budgetary Highlights

Original budget compared to final budget. During the year there was a need to adjust expenditures in the final budget to \$2,390,562 from the originally budgeted expenditures of \$3,597,112. This is a result of decreased estimated expenditures in capital outlay of \$1,025,500. All other budget amendments during the year were relatively minor.

Final budget compared to actual results. During the current fiscal year the City had no significant expenditures in excess of the appropriated amounts in the general fund.

Capital Assets and Debt Administration

Capital Assets

The City's investment in capital assets for its governmental and business-type activities as of April 30, 2014, amounts to \$21,086,150 (net of accumulated depreciation). This investment in capital assets includes land, buildings, machinery, equipment, vehicles, and water and sewer infrastructure. The following summarizes the City's capital assets:

	Governmental Business-type		Τ	otal Primary	
		Activities	 Activities	(Government
Land	\$	955,470	\$ -	\$	955,470
Construction in Progress		346,675	-		346,675
Land Improvements		249,574	-		249,574
Infrastructure		5,237,887	-		5,237,887
Buildings & Improvements		552,073	-		552,073
Equipment		817,266	191,240		1,008,506
Furniture & Fixtures		5,834	-		5,834
Water System		-	2,648,699		2,648,699
Sewer System			 10,081,432		10,081,432
	\$	8,164,779	\$ 12,921,371	\$	21,086,150

More detailed information about the City's capital assets can be found in note 4.

Long-term Debt

As described in note 6 to the financial statements, the City had \$6,333,091 long-term debt at the end of the fiscal year. The City was in process of issuing a new bond as of year end. The City is well under its legal debt limit as of year-end.

Economic Condition and Outlook

Management continues to believe, based in part on the information presented in this audit, that both the economic condition and outlook for Boyne City remains strong, and will so for the forseeable future minus some significant negative external factors..

Both the national and state economies seemed to have stabilized with slow, but steady growth. Those effects can be seen in some of the new developments that are taking place in our community. The Family Fare grocery store has undergone a multi-million dollar upgrade and expansion that will serve its shoppers and the community well for years to come. Catt Development has begun the long awaited residential phase of their One Water Street development and maybe even more significantly begun to explore the possibility of undertaking the redevelopment of a major portion of the 200 block of South Lake Street. McDonalds has begun what is basically the rebuilding of their restaurant here in Boyne City. Several of the industries in and around our Business Park are making significant investments in new equipment in their plants to foster current and future operations and residential growth seems to be making steady improvements.

Those private developments are building off a stronger overall economy and the investments in infrastructure the City continues to make. This year alone the City has invested well over one million dollars, much of it grant money, as it continues to improve its roads and other infrastructure and help make Boyne City a continually better place to live, visit and do business.

A major item for the future is that the City is working on detailed plans to replace much of its existing City Hall complex with new facilities which will serve the public better than the existing ones for decades to come. Work on these facilities will consume much of the City's unassigned fund balance which has been saved over the years for this and other similar capital outlays.

On a possibly negative front legislation is being considered in Lansing which could have negative implications on how Tax Increment Financing (TIF) district like those who fund much of the City's activities in both the downtown and business park. We are keeping a watchful eye on this possibility which could occur before the end of the 2014 calendar year.

Contacting the City

This financial report is designed to provide a general overview of the City's finances to its citizens, customers, investors, and creditors and to demonstrate the City's accountability for the resources it receives. Questions regarding any information provided in this report or requests for additional financial information should be addressed to:

The City of Boyne City 319 North Lake Street Boyne City, MI 49712

City of Boyne City Reconciliation of Governmental Funds Statement of Revenues, Expenditures, and Changes in Fund Balance with Statement of Activities For the Year Ended April 30, 2014

Total Net Change in Fund Balances - Governmental Funds	\$ 271,321
Changes in net position of internal service funds that are treated as enterprise fund changes in net position in the fund level statements are treated as governmental fund changes in net position in the entity-wide statements.	153,050
Governmental fund report capital outlay as expenditures; however, in the Statement of Activities, the cost of those assets is allocated over the estimated useful lives as depreciation expense. This is the amount by which capital outlay expenditures of \$723,738 is in excess of depreciation expense of \$494,428.	229,310
In the Statement of Activities, an expense is recorded for other post-employment benefits (OPEB) to adjust net OPEB obligation to the actuarial determined amount less any contributions to fund the obligation. This is the difference between the prior year and the current year net OPEB obligation.	(8,697)
Changes to accrued interest are not shown in the fund financial statements. The net effect of the current year decrease is to increase net position.	577
Change to compensated absences are not shown in the fund financial statements. The net effect of the current year increase is to decrease net position.	(17,545)

Notes to the Financial Statements

Note 1 – Summary of Significant Accounting Policies

The financial statements of the City have been prepared in conformity with generally accepted accounting principles as applicable to governmental units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial-reporting principles. The more significant of the City's accounting policies are described below.

Reporting Entity

The financial statements of the reporting entity include those of the City of Boyne City (the primary government) and its component units as required by generally accepted accounting principles.

The financial reporting entity consists of the primary government, organizations for which the primary government is financially accountable and other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete. Component units are legally separate organizations for which the elected officials of the primary government are financially accountable. The component units discussed below are included in the City's reporting entity as discretely presented component units because of the significance of their operational or financial relationships with the City. These component units are reported in a separate column to emphasize that they are legally separate from the City. A combining statement of net position and statement of activities for these discretely presented component units are included as part of the basic financial statements.

Discretely Presented Component Units

The *Downtown Development Authority* (the "DDA") is reported in a separate column to emphasize that it is legally separate from the City. The members of the governing board of the DDA are appointed by the City Commission. The budgets and expenditures of the DDA must be approved by the City Commission. The City also has the ability to significantly influence operations of the DDA. Complete financial statements for this component unit are not prepared.

The *Local Development Finance Authority* (the "LDFA") is reported in a separate column to emphasize that it is legally separate from the City. The members of the governing board of the LDFA are appointed by the City Commission. The budgets and expenditures of the LDFA must be approved by the City Commission. The City also has the ability to significantly influence operations of the LDFA. Complete financial statements for this component unit are not prepared.

The *Boyne City Housing Commission* (the "Commission") is reported in a separate column to emphasize that it is legally separate from the City. The members of the governing board of the Commission are appointed by the City Commission. The budgets and expenditures of the Commission must be approved by the City Commission. The City also has the ability to

Notes to the Financial Statements

significantly influence operations of the Commission. The Commission has a September 30 year end. The component unit is audited separately from the City and complete financial statements may be obtained from the Housing Commission's administrative office at 829 South Park Street, Boyne City, Michigan 49712. Accordingly, the City has elected to omit substantially all note disclosures related to the Commission in these financial statements.

Government-wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the primary government. For the most part, the effect of interfund activity has been removed rom these statements. *Governmental activities*, which normally are supported by taxes and intergovernmental revenues, are reported separately from *business-type activities*, which rely to a significant extent on fees and charges for support.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. *Program revenues* include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

Measurement Focus, Basis of Accounting and Financial Statement Presentation

The government-wide financial statements are reported using the *economic resources* measurement focus and the accrual basis of accounting, as are the proprietary fund and fiduciary fund financial statements, except for agency funds which do not have a measurement focus. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the *current financial resources* measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are

Notes to the Financial Statements

collected within 60 days of the end of the current fiscal period or within one year for expenditure-driven grants. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service and compensated absences expenditures are recorded only when payment is due.

Property taxes, sales taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Only the portion of special assessments receivable due within the current fiscal period is considered to be susceptible to accrual as revenue of the current period. All other revenue items are considered to be measurable and available only when cash is received by the City.

The City of Boyne City reports the following major governmental funds:

The *general fund* is the government's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

The *major streets fund* accounts for the maintenance and improvement activities for streets designated as "major" within the City. Funding is primary through state sources.

The *local streets fund* accounts for the maintenance and improvement activities for streets designated as "local" within the City. Funding is primary through state sources.

The *ambulance fund* accounts for the activity of the ambulance services. Funding is primarily from charges for services.

The City reports the following major proprietary funds:

The sewer fund accounts for the activities of the City's sewage collection system.

The *water fund* accounts for the activities of the City's water distribution system.

Additionally, the government reports the following fund types:

Special revenue funds are used to account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specific purposes other than debt service or capital projects.

Internal Service Funds account for the financing of goods or services provided by the City to other departments or funds on a cost reimbursement basis.

Agency funds are custodial in nature and do not present results of operations or have a measurement focus. Agency funds are accounted for using the accrual basis of

Notes to the Financial Statements

accounting. These funds are used to account for asset that the government holds for others in an agency capacity (such as taxes collected for other governments).

As a general rule the effect of interfund activity has been eliminated from the government-wide financial statements.

Proprietary funds distinguish *operating* revenues and expenses from *non-operating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the enterprise funds are charges for services. Operating expenses for the enterprise funds include depreciation on capital assets, labor, supplies and contracted services. All revenues and expenses are not meeting this definition are reported as nonoperating revenues and expenses.

Budgetary and Budgetary Accounting

Budgets presented in the financial statements were prepared on the same basis as the accounting basis used to reflect actual results. The general fund and special revenue funds are subject to legal budgetary accounting controls and all are budgeted annually. The City follows these procedures in establishing the budgetary data reflected in the financial statements:

- 1. The City Commission, by resolution, adopts a budget for the next fiscal year no later than the third week in April of each year.
- 2. Public hearings are conducted to obtain taxpayer comments.
- 3. The City shall appropriate the money needed for municipal purposes during the next fiscal year of the City and shall provide for a levy of the amount necessary to be raised by taxes upon real and personal property.
- 4. Budgetary control is exercised at the functional level, which is the level at which expenditures may not legally exceed appropriations. Any revisions that alter the total expenditures of any department or fund (i.e., budget amendments) require approval by the City Commission. Such amendments are made in accordance with the procedures prescribed under Public Act 621 of 1978.
- 5. The budget and approved appropriations lapse at the end of the fiscal year.
- 6. The City does not record encumbrances in the accounting records during the year as normal practice and, therefore, no outstanding encumbrances exist at year end.

Notes to the Financial Statements

Assets, Liabilities, and Fund Equity

Cash and Cash Equivalents

The City's cash and cash equivalents are considered to be cash on hand, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition.

State statutes and City policy authorize the City to invest in:

- Bonds, securities, other obligations and repurchase agreements of the United States, or an agency or instrumentality of the United States.
- Certificates of deposit, savings accounts, deposit accounts or depository receipts of a qualified financial institution.
- Commercial paper rated at the time of purchase within the two highest classifications established by not less than two standard rating services and that matures not more than 270 days after the date of purchase.
- In United States government or federal agency obligation repurchase agreements.
- Bankers' acceptances of United States banks.
- Mutual funds registered under the Investment Company Act of 1940 with the authority to purchase only investment vehicles that are legal for direct investment by a public corporation.
- External investment pools as authorized by Public Act 20 as amended through March, 1997.

Restricted Cash

Restricted cash consists of bond reserve and bond interest to maintain the City's debt requirements in the water and sewer fund.

Receivables and Payables

Activity between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year and all other outstanding balances between funds are referred to as "due to/from other funds" (i.e., the current portion of interfund loans). Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

Notes to the Financial Statements

All trade receivables are shown net of an allowance for uncollectibles, as applicable. All amounts deemed to be uncollectible are charged against the allowance for doubtful accounts in the period that determination is made.

The ambulance fund receivables are shown net of an allowance for uncollectable accounts. It is composed of expected Medicaid and Medicare write-offs and accounts receivable older than 120 days, which are estimated to be \$51,127.

Prepaid Items

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both the government-wide and fund financial statements. The cost of prepaid items is recorded as expenditures/expenses when consumed rather than when purchased.

Inventories

Inventories are stated at the lower of cost or market; cost is determined by the first-in, first-out method. Inventories are recorded as expenditures when consumed rather than when purchased.

Capital Assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., water system and similar items), are reported in the applicable governmental or business-type columns in the government-wide financial statements. Capital assets are defined by the city as assets with an estimated useful life in excess of two years and an initial individual cost of more than \$5,000. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized.

Capital assets are depreciated using the straight-line method over the following useful lives:

Description	Life
Buildings	20 - 50 Years
Land Improvements	10 - 40 Years
Equipment	5 - 20 Years
Vehicles	5 - 10 Years
Public Domain Infrastructure	20 Years
Water & Sewer Infrastructure	20 - 50 Years

Notes to the Financial Statements

Compensated Absences

It is the City's policy to permit employees to accumulate earned but unused sick and vacation time benefits, subject to certain limitations. All sick and vacation time is accumulated up to a maximum of 720 hours and upon retirement the employee will receive for sick time an amount based on the number of years of service multiplied by 1.5%. Vacation time will be paid in full. The liability for these amounts is included in the government-wide and proprietary fund financial statements. A liability for these amounts is reported in governmental funds only if they have matured, for example as a result of employee resignations or retirements.

Long-term Obligations

In the government-wide financial statements and proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net position. Bond premiums and discounts are deferred and amortized over the life of the bonds using the straight-line method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are expensed when incurred.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

Net Position Flow Assumption

Sometimes the government will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted – net position and unrestricted – net position in the government-wide and proprietary fund financial statements, a flow assumption must be made about the order in which the resources are considered to be applied.

It is the government's policy to consider restricted – net position to have been depleted before unrestricted – net position is applied.

Fund Balance Flow Assumptions

Sometimes the government will fund outlays for a particular purpose from both restricted and unrestricted resources (the total of committed, assigned, and unassigned fund balance). In order to calculate the amounts to report as restricted, committed, assigned, and unassigned fund balance in the governmental fund financial statements a flow assumption must be made about the order in which the resources are considered to be applied. It is the government's policy to

Notes to the Financial Statements

consider restricted fund balance to have been depleted before using any of the components of unrestricted fund balance. Further, when the components of unrestricted fund balance can be used for the same purpose, committed fund balance is depleted first, followed by assigned fund balance. Unassigned fund balance is applied last.

Fund Balance Policies

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. Governmental funds report nonspendable fund balance for amounts that cannot be spent because they are either (a) not in spendable form or (b) legally or contractually required to be maintained intact. Restricted fund balance is reported when externally imposed constraints are placed on the use of resources by grantors, contributors, or laws or regulations of other governments. The government itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance).

The *committed fund balance* classification includes amounts that can be used only for the specific purposes determined by a formal action of the government's highest level of decision-making authority. The City Commission is the highest level of decision-making authority for the government that can, by adoption of a resolution or majority vote prior to the end of the fiscal year, commit fund balance. Once adopted, the limitation imposed by the resolution or majority vote remains in place until a similar action is taken (the adoption of another resolution or majority vote) to remove or revise the limitation.

Amounts in the *assigned fund balance* classification are intended to be used by the government for specific purposes but do not meet the criteria to be classified as committed. The City Commission, or its designee, is authorized to assign fund balance. The City Commission may also assign fund balance as it does when appropriating fund balance to cover a gap between estimated revenue and appropriations in the subsequent year's appropriated budget. Unlike commitments, assignments generally only exist temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment.

Unassigned fund balance is the residual classification for the City's general fund and includes all spendable amounts not contained in the other classifications and is therefore available to be spent as determined by the City Commission.

Property Tax Revenue Recognition

The City property tax is levied on July 1 on the taxable valuation of property located in the City as of the preceding December 31. The billings are due on or before August 31, after which time the bill becomes delinquent and penalties and interest may be assessed by the City; as of March 1 of the succeeding year, unpaid real property taxes are sold to and collected by Charlevoix County.

Notes to the Financial Statements

It is the City's policy to recognize revenues in the current year when they are levied and made available for the financing of City operations. The City considers property taxes levied on July 1 to be revenues of the current period.

Use of Estimates

The process of preparing financial statements in conformity with generally accepted accounting principles requires the use of estimates and assumptions regarding certain types of assets, liabilities, revenues, and expenses. Such estimates primarily relate to unsettled transactions and events as of the date of the financial statements. Accordingly, upon settlement, actual results may differ from estimated amounts.

Subsequent Events

Subsequent events have been evaluated through October 8, 2014, the date the financial statements were available to be issued. Management is not aware of any subsequent events that would have a significant impact on the financial condition of the City.

Note 2 – Excess of Expenditures Over Budget

P.A. 621 of 1978, as amended, provides that a local unit shall not incur expenditures in excess of the amount appropriated.

During the year ended April 30, 2014, the City incurred expenditures in certain budgetary funds which were in excess of the amounts appropriated, as follows:

Variance

				(N	Positive egative)
	Fin	al Budget	 Actual	Final to Actua	
General Fund					
Legal & Accounting	\$	51,000	\$ 53,739	\$	(2,739)

Custodial Credit Risk - Deposits. Custodial credit risk is the risk that, in the event of a bank failure, the City's deposits might not be returned. State law does not require and the City does not have a policy for deposit custodial credit risk. As of year-end, \$5,819,539 of the City's bank balance of \$7,866,858 was exposed to custodial credit risk because it was uninsured and uncollateralized. Due to the dollar amounts of cash deposits and the limits of FDIC insurance, the City believes it is impractical to insure all bank deposits. As a result, the City evaluates each financial institution with which it deposits City funds and assesses the level of risk of each institution; only those institutions with an acceptable estimated risk level are used as depositories.

Credit Risk. State law limits investments to specific government securities, certificates of deposits and bank accounts with qualified financial institutions, commercial paper with specific maximum maturities and ratings when purchased, bankers acceptances of specific financial institutions, qualified mutual funds and qualified external investment pools as identified in the list of authorized investments in the summary of significant accounting policies. The City's investment policy does not have specific limits in excess of state law on investment credit risk.

Notes to the Financial Statements

Interest Rate Risk. Interest rate risk is the risk that the market rate of securities in the portfolio will fall due to changes in market interest rates. State law limits the allowable investments and the maturities of some of the allowable investments as identified in the summary of significant accounting policies. The City's investment policy does not have specific limits in excess of state law on investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates. All certificates of deposits of \$1,509,733 are due within one year.

Note 4 – Capital Assets

Capital asset activity for governmental activities during the year was as follows:

Primary Government	April 30, 20	13 Addition	Reductions	April 30, 2014

Additional information about the Boyne City Housing Commission's (a component unit) capital asset activity can be found in its separately issued financial statements.

Notes to the Financial Statements

Depreciation expense was charged to governmental functions of the City as follows:

Governmental Activities	
General Government	\$ 34,681
Public Safety	85,797
Public Works	326,546
Health & Welfare	28,765
Recreation & Culture	18,639
Depreciation Charged to the Internal Service Fund	38,686
Total Governmental Activities	\$ 533,114
Business-type Activities	
Sewer Fund	\$ 307,543
Water Fund	256,625
Total Business-type Activites	\$ 564,168
Component Units	
Downtown Development Authority	\$ 126,959
Local Development Finance Authority	42,149
Total Component Units	\$ 169,108

Note 5 – Interfund Balances & Interfund Transfers

As of April 30, 2014, the interfund balances were as follows:

Receivable Fund	Payable Fund	<i>P</i>	Amount
Sewer	Major Streets	\$	70,921
Boyne Thunder	General Fund		135

Interfund balances resulted primarily from the time lag between the dates that 1) interfund goods and services are provided or reimbursable expenditures occur, 2) transactions are recorded in the accounting system, and 3) payments between funds are made.

Transfers are used to: 1) move revenues from the fund that is required to collect them to the fund that is required or allowed to expend them; 2) move receipts restricted to or allowed for debt service from the funds collecting the receipts to the debt service fund as debt service payments become due; and 3) use unrestricted revenues collected to finance various programs accounted for in other funds in accordance with budgetary authorizations.

Notes to the Financial Statements

The following transfers occurred between funds of the City for the current year:

Transfer In	ansfer In Transfer Out		Amount
Major Street	General	\$	179,862
Local Street	General		610,260
Ambulance	General		96,086
Fire	General		62,000

Note 6 – Long-term Debt

The following is a summary of long-term debt activity of the City for the year ended April 30, 2014:

Business-type Activities	Balance at rpe Activities April 30, 2013 Additions Deletions			Balance at April 30, 2014	Due Within One Year		
Series 2003, Water supply and sewage disposal system revenue bonds, Maturing serially in 2023 in annual installments ranging from \$70,000 to \$110,000 and bearing interest at 2.50%	\$ 1,000,000	\$ -	\$ 90,000	\$ 910,000	\$ 90,000		
Series 2004, Water supply and sewage disposal system revenue bonds, Maturing serially in 2026 in annual installments ranging from \$340,000 to							
\$510,000 and bearing interest at 2.13%	5,818,091	-	395,000	5,423,091	405,000

Note 7 – Defined Benefit Pension Plan

Plan Description

The City's defined benefit pension plan provides retirement, death and disability benefits to plan members and beneficiaries. The City participates in the Municipal Employees Retirement System of Michigan (MERS), an agent multiple-employer plan administered by the MERS Retirement Board. Act No. 427 of the Public Acts of 1984, as amended, establishes and amends the benefit provisions of the participants in MERS. The Municipal Employees Retirement System of Michigan issues a publicly available financial report that includes financial statements and required supplementary information for MERS. That report may be obtained by writing to

Notes to the Financial Statements

the Municipal Employees Retirement System of Michigan, 447 N. Canal Road, Lansing, Michigan 48917-9755 or by calling (800) 767-6377.

Funding Policy

The City is required to contribute at an actuarially determined rate; the current rate ranges from 12.19% to 20.28% of annual covered payroll. City employees are required to contribute 4.7% of all covered wages. The contribution requirements of the City are established and may be amended by the Retirement Board of MERS. The contribution requirements of plan members are established and may be amended by the City, depending on the MERS contribution program adopted by the City.

Annual Pension Cost

For the year ended April 30, 2014, the City's annual pension cost of \$214,402 for MERS was equal to the City's required and actual contributions. The required contribution was determined using the entry age actuarial cost method. The actuarial assumptions included (a) a rate of return on the investment of present and future assets of 8%, (b) additional projected salary increases up to 4.2% per year, depending on age, attributable to seniority/merit, and (c) an inflationary rate of 4.5%. The actuarial value of MERS assets was determined on the basis of a valuation method that assumes the fund earns the expected rate of return, and includes an adjustment to reflect fair value. The City's unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The remaining amortization period at December 31, 2013, the date of the last actuarial valuation, was 23 years.

The required schedule of funding progress immediately following the notes to the financial statements presents multi year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities of benefits.

Three-vear	Trend Information
------------	-------------------

Fiscal	Fiscal Annual		Net
Year	Pension	of APC	Pension
Ended	Cost (APC)	Contributed	Obligation
2012	\$ 187,978	100%	\$ -
2013	\$ 188,348	100%	\$ -
2014	\$ 214,402	100%	\$ -

Note 8 - Other Postemployment Benefits

Plan Description

The City of Boyne City administers a single-employer defined benefit healthcare plan (the "Plan"). In addition to the retirement benefits described in Note 7, the Plan provides health

Notes to the Financial Statements

insurance benefits to certain retirees and their beneficiaries, which are advance-funded on a discretionary basis. In accordance with City policy, certain individuals and their beneficiaries receive medical, dental, prescription, and eyeglass coverage for varying periods of timing, depending on bargaining unit and years of service. As of April 30, 2014, the date of the last plan valuation, the Plan covered 34 members (28 active plan members and 6 retirees receiving benefits).

Funding policy

The contribution requirements of Plan members and the City are established and may be amended by the Commission. The required contribution is based on projected pay-as-you go financing requirements, with an additional amount to prefund benefits as determined annually by the City Commission. For the year ended April 30, 2014, the City contributed \$10,848 to the Plan. Total member contributions were \$15,086.

Annual OPEB Cost and Net OPEB Obligation

The City's annual other postemployment benefit (OPEB) cost (expense) is calculated based on the *annual required contribution of the employer (ARC)*. The City has elected to calculate the ARC and related information using the alternative measurement method permitted by GASB Statement No. 45 for employers in plans with fewer than one hundred total plan members. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed thirty years. The following table shows the components of the City's annual OPEB cost for the year, the amount actually contributed to the Plan, and changes in the City's net OPEB obligation:

Annual Required Contribution	\$ 34,422
Interest on Net OPEB Obligation	209
Annual OPEB Cost (Expense)	34,631
Less: Contributions Made	 25,934
Increase in OPEB Obligation	8,697
Net OPEB Obligation - Beginning	4,635
Net OPEB Obligation - Ending	\$ 13,332

Notes to the Financial Statements

The City's annual OPEB cost, the percentage of annual OPEB cost contributed to the Plan, and the net OPEB obligation for fiscal year 2014 and the previous years were as follows:

	 Fiscal	<u>ril 30,</u>	,		
	2014		2013	2012	
Annual OPEB Cost (Expense)	\$ 34,631	\$	30,159	\$	30,159
Percentage of OPEB Cost Contributed	75%		116%		99%
Net OPEB Obligation	\$ 13,332	\$	4,635	\$	9,388

Funded Status and Funding Progress

As of April 30, 2014, the most recent actuarial valuation date, the actuarial accrued liability for benefits was \$426,125, all of which was unfunded. The covered payroll (annual payroll of the active employees covered by the Plan) was not available and the ratio of the UAAL to the covered payroll was unknown as well.

The projection of future benefit payments for an ongoing plan involves estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress, presented as required supplementary information following the notes to the financial statements, presents multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits calculations

Methods and Assumptions

Projections of benefits for financial reporting purposes are based on the substantive plan (the Plan as understood by the employer and Plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

The following simplifying assumptions were made:

Retirement age for active employees - Based on the historical average retirement age for the covered group, active plan members were assumed to retire at age 55.

Marital status - Marital status of members at the calculation date was assumed to continue throughout retirement.

Notes to the Financial Statements

Mortality - Life expectancies were based on mortality tables from the National Center for Health Statistics. The 2006 United States Life Tables for Males and for Females were used.

Turnover - Non-group-specific age-based turnover data from GASB Statement 45 were used as the basis for assigning active members a probability of remaining employed until the assumed retirement age and for developing an expected future working lifetime assumption for purposes of allocating to periods the present value of total benefits to be paid.

Healthcare cost trend rate - The expected rate of increase in healthcare insurance premiums was based on projections by the City's management. A flat cost was used in these valuations as the total annual cost has been capped by management.

Health insurance premiums - 2014 health insurance premiums for retirees were used as the basis for calculation of the present value of total benefits to be paid.

Inflation rate - The expected long-term inflation assumption of 3.3 percent was based on projected changes in the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) in The 2006 Annual Report of the Board of Trustees of the Federal Old-Age and Survivors Insurance and Disability Insurance Trust Funds for an intermediate growth scenario.

Payroll growth rate - The expected long-term payroll growth rate was assumed to equal the rate of inflation.

Based on the historical and expected returns of the City's short-term investment portfolio, a discount rate of 2.50 percent was used. In addition, a simplified version of the entry age actuarial cost method was used. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payrolls on an open basis. The remaining amortization period at April 30, 2014, was 27 years.

Note 10 – Risk Management

The City is exposed to various risks of loss related to property loss, torts, errors and omissions, and employee injuries (workers' compensation). The risks of loss arising from general liability, property and casualty, and workers' compensation are managed through purchased commercial insurance.

Notes to the Financial Statements

Note 11 – Fund Balances – Governmental Funds

The City reports fund balance in governmental funds based on the provisions of GASB Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*. GASB 54 establishes fund balance classifications that comprise a hierarchy based primarily on the extent to which a government is bound to observe constraints imposed upon the use of the resources reported in governmental funds.

October 8, 2014

Honorable Mayor and Members of the City Commission City of Boyne City, Michigan

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Boyne City, Michigan (the "City") for the year ended April 30, 2014. Professional standards require that we provide you with information about our responsibilities under generally accepted auditing standards and *Government Auditing Standards*, as well as certain information related to the planned scope and timing of our audit. We have communicated such information in our letter to you dated July 8, 2014. Professional standards also require that we communicate to you the following information related to our audit.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the City are described in Note 1 to the financial statements. No new accounting policies were adopted and the application of existing policies was not changed during the fiscal year 2014. We noted no transactions entered into by the City during the year for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimate(s) affecting the City's financial statements was:

- Management's estimate of the current year capital asset depreciation expense is based on the estimated useful lives of the City's capital assets. We evaluated the key factors and assumptions used to develop the current year capital asset depreciation expense in determining that the depreciation expense, and ending net book value of the underlying assets, are reasonable in relation to the financial statements taken as a whole.
- Management's estimate of the accrued compensated absences and the related pay rates as of April 30, 2014.

• Management's assumptions used to calculate the actuarial report and the net present value of post employment benefits, including health and pension benefits.

The financial statement disclosures are neutral, consistent, and clear.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are clearly trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. In addition, none of the misstatements detected as a result of audit procedures and corrected by management were material, either individually or in the aggregate, to each opinion unit's financial statements taken as a whole.

Disagreements with Management

For purposes of this letter, a disagreement with management is a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated October 8, 2014.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the City's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the City's auditors.

However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

Other Matters

We applied certain limited procedures to management's discussion and analysis, schedules of funding progress, and the budgetary comparison schedules, which are required supplementary information (RSI) that supplements the basic financial statements. Our procedures consisted of inquiries of management regarding the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We did not audit the RSI and do not express an opinion or provide any assurance on the RSI.

We were engaged to report on the combining and individual nonmajor fund financial statements, which accompany the financial statements but are not RSI. With respect to this supplementary information, we made certain inquiries of management and evaluated the form, content, and methods of preparing the information to determine that the information complies with accounting principles generally accepted in the United States of America, the method of preparing it has not changed from the prior period, and the information is appropriate and complete in relation to our audit of the financial statements. We compared and reconciled the supplementary information to the underlying accounting records used to prepare the financial statements or to the financial statements themselves.

Restriction on Use

This information is intended solely for the use of the City Commission and management of the City of Boyne City and is not intended to be, and should not be, used by anyone other than these specified parties.

Very truly yours,

Gabridge & Company, PLC

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

Honorable Mayor and Members of the City Commission City of Boyne City, Michigan

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, the discreetly presented component units, each major fund, and the aggregate remaining fund information of the City of Boyne City, Michigan (the "City"), as of and for the year ended April 30, 2014, and the related notes to the financial statements, which collectively comprise the City's basic financial statements and have issued our report thereon dated October 8, 2014.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the City's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control. Accordingly, we do not express an opinion on the effectiveness of the City's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or, significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the City's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
