

Lake Superior Academy

2018/2019 Pest Control Report

Lake Superior Academy Pesticide Notice

The Academy is required by Michigan Regulations 637, Rule 14, PA 171 to maintain an effective pest control program for our buildings. As part of an effective pest management program, school buildings and grounds may be treated as needed to control or eliminate pests. The least hazardous methods will always be incorporated to remove pests as per the Michigan Pesticide Control Act. Under most circumstances chemical treatments will be a last resort.

Only a licensed person or company shall be allowed to apply commercial grade pesticides or herbicides. Advance notice of the pesticide application will be given at least 48 hours before the application. Notices of the application will be posted at Academy entrances and in main office.

In addition, parents may request in writing to receive written notification at least three (3) day prior to the pesticide application. In case of an emergency, pesticides may be applied without prior notice. The Academy will provide notice of the emergency application as soon as possible.

If you have any questions or wish to request prior notification of the application, please see the Academy Administrator.
