

## Posting Requirements

The following information is provided to assist districts in meeting the posting requirements stipulated in PA 173 Section 1249(3)(c). It is worth noting that MASB's instrument is intended for use by school board members in the evaluation of superintendents. As such, effort has been invested to ensure that the language in the rubrics and the recommended process is easy for noneducators to understand and implement.

## Research Base

National Policy Board for Educational Administration (2015). [Professional Standards for Educational Leaders 2015](#). Reston, VA: Author.

The 2015 Standards are the result of an extensive process that took an in-depth look at the new education leadership landscape. It involved a thorough review of empirical research (see the Bibliography for a selection of supporting sources) and sought the input of researchers and more than 1,000 school and district leaders through surveys and focus groups to identify gaps among the 2008 Standards, the day-to-day work of education leaders and leadership demands of the future. The National Association of Elementary School Principals, National Association of Secondary School Principals and American Association of School Administrators were instrumental to this work. The public was also invited to comment on two drafts of the Standards, which contributed to the final product. The National Policy Board for Education Administration, a consortium of professional organizations committed to advancing school leadership (including those named above), has assumed leadership of the 2015 Standards in recognition of their significance to the profession and will be their steward going forward.

Midcontinent Research for Education and Learning (2006). [School District Leadership That Works: The Effect of Superintendent Leadership on Student Achievement](#). Denver, CO: Author.

To determine the influence of district superintendents on student achievement and the characteristics of effective superintendents, McREL, a Denver-based education research organization, conducted a meta-analysis of research—a sophisticated research technique that combines data from separate studies into a single sample of research—on the influence of school district leaders on student performance. This study is the latest in a series of meta-analyses that McREL has conducted over the past several years to determine the characteristics of effective schools, leaders and teachers. This most recent meta-analysis

examines findings from 27 studies conducted since 1970 that used rigorous, quantitative methods to study the influence of school district leaders on student achievement. Altogether, these studies involved 2,817 districts and the achievement scores of 3.4 million students, resulting in what McREL researchers believe to be the largest-ever quantitative examination of research on superintendents.

## Authors

The Michigan Association of School Boards has served boards of education since its inception in 1949. In the decades since, MASB has worked hands-on with tens of thousands of school board members and superintendents throughout the state. Evaluation of the superintendent has been a key aspect of that work – MASB developed superintendent evaluation instruments and trained board members in their use nearly half a century before the requirements.

MASB staff and faculty involved in creating the MASB 2016 Superintendent Evaluation instrument Include:

- Rodney Green, Ph.D., Superintendent of Schools (retired), East China
- Olga Holden, Ph.D., Director of Leadership Services (retired), MASB
- Donna Oser, CAE, Director of Executive Search and Leadership Development, MASB
- Debbie Stair, MNML, former school board member, Board Development Manager, MASB

New York Council of School Superintendents staff and leadership involved in creating the Council's Superintendent Model Evaluation (which significantly influenced MASB's instrument):

- Jacinda H. Conboy, Esq., New York State Council of School Superintendents
- Sharon L. Contreras, Ph.D., Superintendent of Schools, Syracuse City SD
- Chad C. Groff, Superintendent of Schools
- Robert J. Reidy, Executive Director, New York State Council of School Superintendents
- Maria C. Rice, Superintendent of Schools, New Paltz CSD
- Dawn A. Santiago-Marullo, Ed.D., Superintendent of Schools, Victor CSD
- Randall W. Squier, CAS, Superintendent of Schools, Coxsackie-Athens CSD
- Kathryn Wegman, Superintendent of Schools (retired), Marion CSD

## Validity

Validity refers to how well an instrument measures what it is supposed to measure. Construct validity was established for the MASB 2016 Superintendent Evaluation instrument. Construct validity

ensures the assessment is actually measuring superintendent performance. Validity was established using of a panel of experts familiar with the research base and work of the effective school superintendent. The experts examined the research, identified performance indicators for measure and refined the scale for measurement.

Panel members included:

- Rodney Green, Ph.D., Superintendent of Schools (retired), Consultant, MASB
- Olga Holden, Ph.D., Director of Leadership Services (retired), MASB
- Mary Kerwin, former school board member, Senior Consultant, MASB
- Debbie Stair, MNML, former school board member, Board Development Manager, MASB

## Efficacy

Efficacy refers to the capacity of the evaluation instrument to produce the desired or intended results. The MASB 2016 Superintendent Evaluation instrument has three intended outcomes:

1. To accurately assess the level of a superintendent's job performance
2. To improve the superintendent's professional practice and impact on student learning
3. To advance the goals of the school district

MASB will seek to establish efficacy of the MASB 2016 Superintendent Evaluation instrument by surveying school board members and superintendents from a representative sample of school districts (see details below). An electronic survey instrument will be used to ascertain the extent to which:

1. The district followed the prescribed process for conducting the evaluation, and
2. The evaluation instrument and prescribed process supported the stated outcomes

## Reliability

Reliability is the degree to which an evaluation instrument produces stable and consistent results. While there are several types of reliability, MASB will seek to establish the test-retest reliability of the MASB 2016 Superintendent Evaluation instrument. Test-retest reliability is a measure of reliability obtained by administering the same instrument twice over a period of time to a group of individuals. To accomplish this, a representative sample of school districts using the MASB 2016 Superintendent Evaluation instrument will participate in a reliability study. A minimum of 15 school districts (with low board member turnover and no transition in the superintendency) will conduct an evaluation at the

midpoint of their evaluation cycle (T1) and again at the end of their evaluation (T2). Scores from the two assessments will then be correlated in order to evaluate the test for reliability. A coefficient of 7.0 or higher will indicate acceptable stability.

## Evaluation Rubric

The complete MASB 2016 Superintendent Evaluation instrument is available in the following formats:

- [Microsoft Word](#)
- [Microsoft Excel](#)
- [PDF](#)

## Evaluation Process

**Planning:** At the beginning of the year in which the evaluation is to occur, the Board of Education and superintendent convene a meeting in public and agree upon the following items:

- Evaluation instrument
- Evaluation timeline and key dates
- Performance goals (if necessary beyond performance indicators outlined in rubric, district-wide improvement goals and student growth model)
- Appropriate benchmarks and checkpoints (formal and informal) throughout year
- Artifacts to be used to evidence superintendent performance
- Process for compiling the year-end evaluation
- Process and individual(s) responsible for conducting the evaluation conference with the superintendent
- Process and individual(s) responsible for establishing a performance improvement plan for the superintendent, if needed
- Process and individual(s) responsible for sharing the evaluation results with the community

**Checkpoints:** The Board of Education and superintendent meet at key points in the evaluation year as follows:

- **Three months in – *Informal update*** – Superintendent provides written update to the board. Board president shares with the superintendent any specific concerns/questions from the board.

- **Six months in – Formal update** – Superintendent provides update on progress along with available evidence prior to convening a meeting in public. Board president collects questions from the board and provides to superintendent prior to meeting. Board and superintendent discuss progress and make adjustments to course or goals, if needed.
- **Nine months in – Informal update** – Superintendent provides written update to the board. Board president shares with the superintendent any specific concerns/questions from the board.
- **11-12 months in – Formal evaluation** – Superintendent conducts self-evaluation; presents portfolio with evidence to Board of Education (made available prior to meeting). Board members review portfolio prior to evaluation meeting; seek clarification as needed. Board president (or consultant) facilitates evaluation. Formal evaluation is adopted by Board of Education.

#### Evidence

Validity, reliability and efficacy of the MASB 2016 Superintendent Evaluation instrument relies upon board members using evidence to score superintendent performance.

- Artifacts to serve as evidence of superintendent performance should be identified at the beginning of the evaluation cycle and mutually agreed upon by the Board of Education and the superintendent.
- Artifacts should be limited to only what is needed to inform scoring superintendent performance. Excessive artifacts cloud the evaluation process and waste precious time and resources.
- Boards of education and superintendents should establish when artifacts are to be provided, i.e., as they originate, at designated checkpoints, during self-evaluation, etc.

A list of possible artifacts that may be used as evidence is provided at the end of each professional practice domain rubric. Appendix D of the evaluation instrument offers additional artifacts that may serve as evidence of performance.
